TAG Insights

Cassandra Reputation Services

Product Brochure

Product Overview

In today's dynamic threat environment, enterprises need to have up-to-date threat intelligence to protect their networks. One way to get this intelligence is to subscribe to threat feeds from original equipment manufacturers (OEMs). These feeds provide updated lists of malicious IP addresses, URLs, and signatures. While threat feeds can help enterprises improve their security posture, there are some downsides to consider in terms of high cost, lack of subscription flexibility, no central management and vendor lock-in

The TAG Advantage

Lower Cost:

TAG-Insights Cassandra is significantly less expensive than traditional OEM offerings.

Greater flexibility:

TAG-Insights Cassandra allows enterprises to customize their threat intelligence to meet their specific needs.

Centralized Management:

TAG-Insights Cassandra is centrally managed, making it easier for enterprises to track and manage threats.
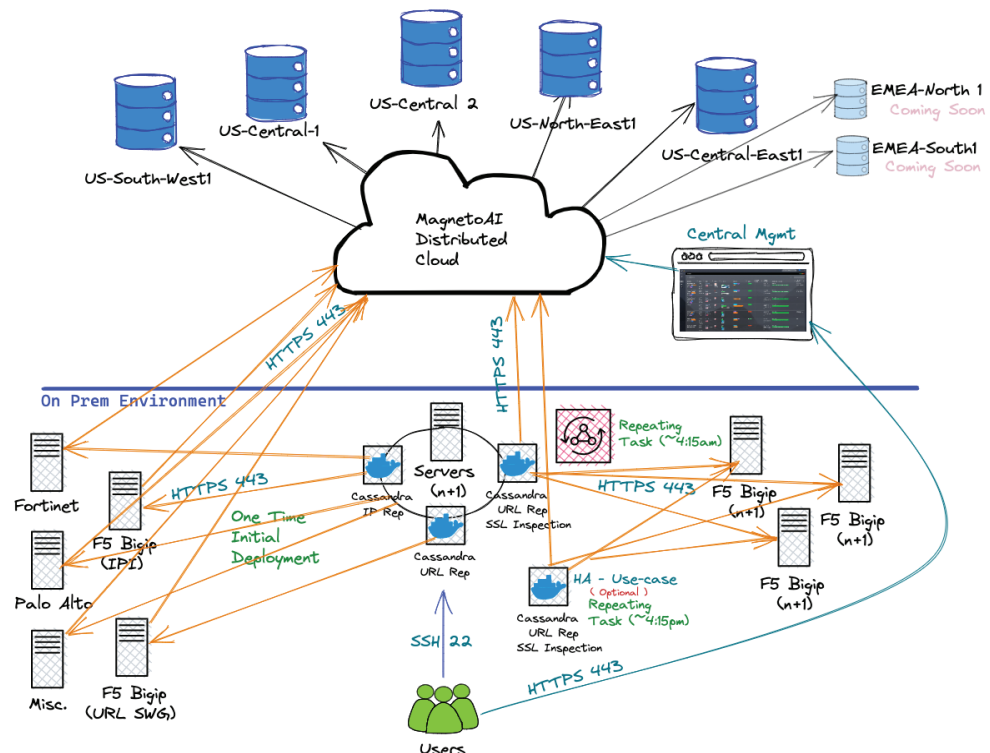

No vendor lock-in:

TAG-Insights Cassandra does not lock enterprises into a particular OEM, making it easier for enterprises to switch to a different solution if needed.

TAG-Insights Cassandra aims to revolutionize the IP Reputation, URL Filtering, and IPS Signature market by offering a cost-effective and innovative value proposition that disrupts the legacy offerings of OEMs.

TAG-Insights Cassandra provides a number of key advantages over traditional OEM offerings.

The TAG Difference

TAG-Insights Cassandra is the only solution on the market that offers all of these advantages. As a result, TAG-Insights Cassandra is poised to disrupt the IP reputation, URL filtering, and IPS signature market.

Here are some additional details about TAG-Insights Cassandra:

- TAG-Insights Cassandra is a cloud-based solution that provides up-to-date threat intelligence to enterprises.

- TAG-Insights Cassandra uses a variety of sources to collect threat intelligence, including public and private feeds, honeypots, and threat research.

- TAG-Insights Cassandra provides a variety of threat intelligence products, including IP reputation lists, URL filtering lists, and IPS signatures.

- TAG-Insights Cassandra is available on a subscription basis.

If you are looking for a cost-effective and innovative threat intelligence solution, TAG-Insights Cassandra is the perfect choice for you.

OEM's covered

- ✔ Palo Alto Networks
- ✔ Fortinet
- ✔ F5 Networks
- ✔ Netscout (Arbor Sightline)
- ✔ Juniper

Use Cases

- ✔ NexGen Firewall
- ✔ Network Firewall
- ✔ IPS/IDS
- ✔ SSL Intercept
- ✔ UTM

Why Do Customers Choose TAG Insights Cassandra for IP Reputation & URL Filtering Services?

- Central Dashboard for Management, Visibility & Configuration

- Flexible Subscription Terms

- 24hr Custom IP & URL List Turnaround

- Custom Protect List Capability

Follow the TAG Insights lighthouse beacon to better visibility, better protection, more flexibility at 30-50% less cost.

TAG Insights Cassandra Differentiators:

- Typically, 30-50% less expensive than OEM equivalent

- Single Pane of Glass Central Management & Visibility

- Subscription Flexibility: 3-60mo subscription terms and site license options

- Device Transferability. Move active subscriptions from one OEM to another

- Protection - Class leading machine learning and sensor network provide cutting edge analytics and intelligence

- Real time and user configurable update capability
